

WHAT TO DO AFTER YOU ORDERED THE IGENEX KIT?

Step 01

Complete Paperwork with your doctor

- Together with your doctor, complete all appropriate paperwork included in kit.
- Your doctor will help you determine which tests to order.
- Incomplete paperwork will result in testing delays.

If you have paid a deposit for the kit, make sure to use the original requisition received with the kit. Photocopies will not be honored for giving credit for the deposit.

Step 02

Have your samples drawn and shipped

- Follow instructions from your physician's office on where to get your samples drawn.
- If you need to locate a drawing laboratory, there are some listed on our website. Otherwise, contact your local hospital laboratory.
- Take ALL of the completed paperwork and entire kit to the drawing laboratory.
- Once the samples have been drawn, the kit can be sent to IGeneX using the FedEx shipment bag with prepaid FedEx label.

Step 03

Get Results

- IGeneX will conduct the tests as determined by you and your doctor.
- The results will be sent to your doctor when completed.
- The last step is to visit your doctor for interpretation of results, diagnosis, and to discuss your treatment options.
